

CT-2010

Scale Inhibitor, Sludge Conditioner and Dispersant for Boiler Systems

Introduction

CT-2010 is an organic polymer, phosphate based compounds, used for boilers under any pressure to precipitate calcium and magnesium hardness as phosphate sludge.

Physical Properties

Appearance.....Florissant green Liquid
S.G.....1.1 \pm 0.02.
PH.....7 - 8
Flash Point.....Non flammable
Odor.....Odorless
Solubility.....Completely

Application

CT-2010 is normally maintained within set limits in boiler water. The Optimum treatment dosage depends on the operating conditions such as: boilers pressure, and the chemical characteristics of the treated water.

Safety and Handling

Avoid contact with eyes and skin. In case of an accidental contact, flush thoroughly with plenty of water.

Storage

- Store in cool, dry and well-ventilated area.
- Keep containers after use.

Packaging

CT-2010 is available in 25 kg plastic container
