

CT-2092

Reverse Osmosis Membrane Preservative

Introduction

CT-2092 is a membrane preservative used to prevent bacterial growth and slime build-up in a variety of membrane types.

CT-2092 is formulated to be compatible with thin film polyamide polysulfone, PVDF and cellulose acetate membranes.

Physical Properties

Appearance.....	Pale yellow
S.G.....	1.15 ± 0.03
PH.....	5 (5% sol.)
Flash Point.....	Nonflammable
Odor.....	Characteristic
Solubility.....	Completely soluble

Application

Water used to prepare the solution must be free from residual chlorine or other oxidizing agents using CT-2099. The required dilution ratio and procedure for application this product will be specified by our technical representative.

Safety and Handling

- Avoid breathing dust.
- Avoid contact with eyes, skin or clothing. Wash contaminated cloth before re-use.
- Wash thoroughly after handling

Storage

- Store in cool, dry and well ventilated area.
- Keep containers closed all time.

Packaging

CT-2092 is available in 25 kg containers
