

# CT - 225

## Metal Bright

### Introduction

CT-225 is a liquid cleaner formulated to remove rust and dirt stains from metal. It is effective as a phosphatizer, metal, conditioner or wash primer to painting steel surfaces.

CT-225 is safe on brass, copper, aluminum, stainless steel and chrome. It will effectively clean, brighten, and protect metal surfaces from rust.

### Physical Properties

Appearance.....	Pink color
S.G.....	01.2
PH.....	1.2
Flash Point.....	Nonflammable
Odor.....	Odorless
Solubility.....	Completely soluble

### Application

CT-225 is normally used as full strength for removal of oxides from metal surfaces but can be diluted with fresh water for removing rust stains from painted surfaces. For the best result, surfaces to be cleaned should be free of oil and grease. It is excellent as a general purpose cleaner-brightener but it is not intended for the removal of heavy rust or scale deposits, not for use on zinc or galvanized metals.

### Safety and Handling

CT-225 will not damage good dry paint, wood or caulking materials, however, it is an acid solution and shouldn't be used on zinc or galvanized metals. Avoid contact with skin or eyes as it causes skin irritation.

Do not swallow

### Storage

- Keep the container closed after use.
- Keep away from direct sunlight.
- Keep away from excess heat or cold.

### Packaging

CT-225 is available in 20 liter containers.
