

CT - 350

Lube Oil Cooler Cleaner

Introduction

CT-350 is a non-toxic, non-volatile carbon solvent designed to clean lube oil coolers through the circulation method. It has a high flash point so it can be used safely under normal working conditions.

Physical Properties

Appearance.....	Clear yellowish liquid
S.G.....	0.72
PH.....	Non
Flash Point.....	90 °C
Odor.....	Odorless
Solubility.....	Not Soluble

Application

Break intake and discharge lube oil lines closest to cooler using small pump.

Circulate **CT-350** from open 55 gallon drum through cooler in reverse of natural flow for a period not less than (8) hours.

Return line to drum should be filtered through strainer fitted to top of drum. Do not heat solution and use at engine room temperature for best result.

Safety

Precautions should be taken to avoid contact with skin and eyes. Use protective clothing and goggles. Do not take internally. In case of contact, flush with water and get medical care.

Storage

- Keep **CT-350** away from extreme heat or open flame.
- Keep away from direct sunlight
- Keep the container closed after use.

Packaging

CT-350 is available in 20 liter plastic container.
